

This little box could make you *very* popular...

...It's **guaranteed** to save your customers money!

The Beckett HeatManager™ is a patented, microprocessor control that automatically adjusts the burner run pattern to match the system's heat load, substantially improving efficiency.

For use on new or existing boilers,* HeatManager works with the existing boiler control to deliver the right amount of heat to the home at the right time.

The Good News For You:

- Works with any fuel
- Extremely simple to install
- No outdoor sensor required
- Works with domestic hot water systems
- Requires absolutely no programming or setup
- Five-year replacement warranty

The Good News For Your Customer:

Tell your customers that the HeatManager will:

- improve the efficiency of their heating system.
- reduce their heating bills by 10-20% — guaranteed!
- be fully refunded if they don't save at least 10%.
- usually pay for itself in just two heating seasons.
- reduce wear and tear on their boiler.

Be sure to give your customers the homeowner pamphlet (Form No. 61571 08/04) and refer them to the HeatManager website!
